

Pressure & Temperature C & W - Series Switches

-

The 'User-Friendly generation' of BETA Pressure & Temperature Switches.

Safety:

- Safe, secure electrical hookup by clamp terminals

ON ON

BETAR

au

- Standard earth terminal
- IP 66 enclosure (NEMA 4X)
- Solid cover with gasket and captive screws

Reliability:

- Highest overrange protection
- Spring loaded piston, excellent resistance against shock and vibration
- Flexible stainless steel mounting bracket to avoid pipe strains on the instrument to cause shift of setpoint

Product Approvals:

 Complete W-Series is explosion safe certified in EU (ATEX), in USA (FM), in Canada (CSA), in Russian Customs Union (CUTR 012), world wide IECEx. C-series Option i is intrinsically safe certified in EU, in USA (FM), in Canada (CSA), in Russian CU and world wide IECEx. All switches are certified acc. PED. All switches are SIL 3 certified.

Quality and Factory approvals

DNV certified Quality Assurance according to ISO 9001 – 2015 and ISO 14001 - 2015, covers all switch manufacturing,engineering and design.
 TÜV: PED Module D, cert. CE 0035

— DEKRA: ATEX Annex VII, CE 0344

Economy:

 A wide range of wetted process materials enable proper selection for any application.

BETE

Service:

 The international BETA sales network backs up this high quality product with equally high quality service.

Benefits:

- Our products are distinguished by highest reliability and are used in virtually any sector of industry. Highest quality and worldwide certification of our products for safety-critical applications ensure reliable monitoring of your plant, equipment or installation.
- BETA safety switches are assembled according to your requirements and are available in more than 10 million versions. Your special request might be a standard for us. Please contact us to discuss your requirements

- "We will be pleased to advise you" -

THE "USER FRIENDLY" GENERATION

The BETA principle:

"A high quality, self-aligning springloaded/- piston sensor is the heart of each BETA switch. The limited piston travel transmits pressure at the process diaphragm directly to the microswitch, with no intervening linkages or mechanisms while providing full protection against high overrange pressure".

> The piston sensor is isolated from the process fluid by a diaphragm and static O-ring seal and retained by a process connection port.

These (3) are the only process wetted parts and are available in an extensive range of materials."(*)

(*) A BETA vacuum switch contains also a vacuum piston and spring (SS 316) on the wetted parts side.

> The BETA switch has "designed-in" reliability <

- The "User Friendly Generation" is no idle boast. BETA can – and always will – supply the best - instrumentation for the given conditions.
- Many years of close attention to our customer's requirements have resulted in a vast experience of virtually all known switch applications.
- Major users all over the world, in all areas of industry, already enjoy the benefits of

BETA's "User Friendly" Switches.

BETA SWITCH PRINCIPLE

Guide Of How To Select Your BETA Switch:

BETA uses a simple and logical **modelcode** system for easy, accurate product specification, project coordination, efficient document handling and after sales service.

C3

RANGES for Pressure switches:

- **P304L** - S1N - B1 - K1 - Y - X2

"Ranges" given here are valid for setpoints at **increasing pressures** (also vacuum) of the **high end** of the range, and **decreasing** for the **low end** of the range.

The "Deadband" values are the max. possible values for a standard micro switch & diaphragm/ O-ring combination. Deadband and varies nearly linear with setpoint between indicated limits of range and should be multiplied by deadband multipliers as given in section 4 and 5, where appropriate. For Fluid Power multiplier acc. to section 5 only.

RANGE CODE	ADJUSTABLE R	ANGE	MAX. DEADB/	AND	MAX. OVERRANGE PRESSURE	PROOF PRESSURE		
P 301 L 1)	[2 - 15]	mbar	[1.1 - 1.9]	mbar	10 bar	15 bar

D 356 H	[120 - 1450]	[mbar]	[50]	[mbar]	200	bar	200	J)	udr	ar 200	Dar
D 359 H	[150 - 3450]	[mbar]	[75]	[mbar]							

RANGES for Bi-Directional:

D 356 D	[100 - 1500]	[mbar]	[35 - 65]	[mbar]	200	har	200 5)	bor	200	bor
D 358 D	[100 - 3500]	[mbar]	[45 - 115]	[mbar]	200	bar	200 3)	bar	200	Dar

NOTES:

- 1) Ranges and deadbands are given at 50% of Max. Static pressure. All differential pressure sensors are sensitive to static pressure, both for setpoint and deadband.
- 2) Range only with L1 micro switch.
- 3) D...L can withstand a differential pressure P-Low max. 1 bar above P-High.
- 4) P 301L...D can withstand a differential pressure P-Low max. 100 mbar above P-High.
- 5) D...M, D...H and D...D can sustain full High and Low-side reversal.
- 6) Only available with G3-enclosure.
 - For more details, page 16.

The following table show the INFLUENCE for INCREASING STATIC PRESSURE:

SENSOR	SETPOINT	DEADBAND
P301LD	= + 0.1 mbar/bar	= + 0.1 mbar/bar
DL	- 0.7 mbar/bar	= - 0.1 mbar/bar
DM	= + 3 mbar/bar	+ 10 mbar/bar
DH	- 2 mbar/bar	= - 0.4 mbar/bar

Example:

D...H - type Diff. setpoint: 1 bar (1000 mbar). If static pressure increases 10 bar then the differential setpoint will be: (10 times - 2 mbar) = 20 mbar - 1000 mbar = 980 mbar.

NOTE:

For differential application outside above ranges consult your BETA Representative.

Process Connections:

T1		Buna-N		
T2		Viton-A 5)	Highly corrosive and permeativr gases	
Т3	Tantalum	Neoprene	and non-acid liquids.	2.0
T4		PTFE 4)	Select O-ring as required.	
T5		Kalrez 2) 5)		
V2	Viton-A	Viton-A	Process temperature NOT below minus 10°C.	7) 1.5
S0	SS 316 Welded	None 3	Highly permeative gases	30
MO	Monel diaphragm			0.0

 Wetted parts are suggested for use on the service indicated. However they do not constitute a guarantee to be suitable for a given process against corrosive or permeation since processes vary from plant to plant. Empirical experience by users should be the final guide. The diaphragm / O-ring combinations are for process temperatures of -30°C to +80°C, unless otherwise indicated. For process temperatures beyond these limits please contact your BETA Switch Representative.

- 2) Switches for fluid power applications are limited to these options (O-ring only with 316SS piston).
- **3)** Only for 1/4" & 1/2" process connections. Not available on vacuum switches. For other sizes and materials, consult your BETA Switch Representative.
- PTFE O-ring not suitable for vacuum switches or vacuum surge conditions. (Wetted internal spring of Co-Cr-Ni-Mo alloy, comparable with Elgiloy).
- 5) For process temperature > 100°C, consult your BETA Switch Representative.
- 6) Other diaphragm materials like Hastelloy available, consult your BETA Switch Representative.
- 7) High temperature refers to max. 130°C at process connection.

DIFFERENTIAL PRESSURE SWITCHES

Differential Pressure Switches include a similar type of Diaphragm/O-ring combinations as for Pressure Switches, but the following must be considered:

ТҮРЕ	STANDARD	FOLLOWING COMBINATIONS ARE POSSIBLE:
P301L/ DL	B1	All except with PTFE O-Ring and Welded diaphragm.
DM	B1	All diaphragm and O-Ring combinations.
DH	P1	Metal + TCP.
DD	P1	Metal + TCP.

Note: Deadband Multiplier for Diaphragm/O-Ring and switching element are similar as for a pressure switch.

SG	3)	Manual 16561	Actuates automatic on decreasing pressure.	480/ 15A	125/ 0.5A	1.5	0,
SV 3)1	11)	DC-service	High DC cap. magnetic blow out.	125/ 10A	125/ 10A	5.0	
SA		Pneumatic 7)	Normally closed (NC).	For use in ex	kplosive atm.	Consult BETA	Single Only
SB	3)	AIR Relay Normally open (NO).		KEMA 04ATEX4060		Switch Rep.	Single Only

1) For D.P.D.T. action second code figure should be specified as "2" (Example: K1 = S.P.D.T ./ K2 = D.P.D.T.).

- 2) Actual capacitive or inductive load under VDC may influence the setpoint repeatability.
- 3) Not on Differential pressure switches (except for "SR"-micro in "W"-enclosure).
- 4) VDE certified acc. to. DIN EN 61 058-1:1992+A1:1993.
- 5) "SR"-and "H1"-micro switches, with high multiplier, can affect the low end of a range.
- 6) "SR"-micro in combination with metal diaphragm: standard with option "P".
- 7) For pneumatic element (select C1 or C8 enclosure) or ask your BETA representative for Air Relay documentation.
- 8) For DC rating resistive loads are stated.
- 9) In "W..." Enclosure max 10A current rating allowed, will be stated on the nameplate.
- 10) Subminiature microswitch, only possible with selection for DPDT configuration for W-enclosure.
 - ** DC rating not U.L. listed, although experience and third party testing confirm the DC voltage ratings. Consult your BETA Switch Representative.
- 11) Not suitable for use at less than 1.5A

Note:

- Micro switches both for single and double action respectively SPDT and DPDT, are intended to be set for one setpoint and one direction only.
- > The deadband reset value is a result of the complete modelcode selection and actual switch asssembly, so except for the SR/SP microswitch, the reset switching point is fixed and cannot be controlled by the manufacturer.
- > Please keep in mind that even within a series of similar model, the reset switching point can vary.
- Proper application of SR and SP micro switches requires accurate statement of values to the setpoint and required reset setpoint.

If you have any specific question or requirement contact us at: 2sales@beta-b.nl

	I	5)	Intrinsically safe application Ex i. Only on "C"-Series.					
	м	2)	Vacuum protector plate (Not on Vacuum-, Fluid Power-, DH- and DD Switch) (Standard on DL).					
	Р		Recommended on strong process pulsations. Only on "H"-Sensors. Not in combination with EPDM, Neoprene, Viton-A and Kalrez diaphragms.					
	S	3)	Stainless steel Tag key ringed to enclosure. Tag has 2 lines (16 characters per line).					
	v		Fungicidal varnish coating (internal).					
	Y	4)	Epoxy coating of switch (external). Only in combination with SS 316 process connection. SS Parts are not coated.					

- 1) Option B Oxygen cleaning acc. SP19. Not possible for D..H ranges/ for G3-P301L-..D and D..L ranges on Hi-side connection only.
- 2) Option M Is only to intend to provide a limited protection against surge/ vacuum conditions, as which can occur during start-up conditions or repetitive applications (pumps/ compressor). So short occurances over a limited period of time.

It is not intended for continous surge/ (full) vacuum conditions over an extended period of time.

Indication:

RANGE:	Max. Surge Pressure:	Approx. period of time: (minutes)		
P3L	-200 mBarg	60		
P4M	-200 mBarg	60		
Р5-7-8-9Н	-600 mBarg	90		

- Values stated here for indicative purpose only, they do not constitute any true value or any kind of warranty.
- Option M is considered as wetted part and as such is explicitly excluded from the BETA factory warranty.

Tag no. space on nameplates are added free of charge

 Standard nameplate C-Series 	: 2 lines with 16 characters or spaces + 1 line with 14 characters or spaces.
W-Series	: 1 line with 16 characters or spaces.
Option " S "	: 2 lines with 16 characters or spaces.
	Only if explicitly stated on your purchase order. If not it will be left blanc
	Only if explicitly stated on your purchase order. If not it will be left blanc

4) Air dried system acc. to BETA procedure, dry film thickness approx. 200 µm, finish pearl grey gloss.

5) Ex I certification is under review due changing standard.

To become applicable 2nd half 2024.

* Consult factory in case needed

PRESSURE & TEMPERATURE SWITCHES

Specials:

C3 - P304L - S1N - B1 - K1 - Y - <mark>X2</mark>

We can incorporate many specials to meet your requirements.

These special requirements are indicated by the letter "X" in the modelcode positioned or at the end of the model number, followed by a figure showing the number of specials.

Example:

"X1" at the end of modelcode reference means one special.

"X2" at the end of the modelcode reference means two specials have been incorporated.

Details of each special must be specified completely on enquiries and orders.

Example for specials for BETA switches are:

- Flanged connection 3/4" to 3" (ANSI or DIN).
- Range indication in Pa, Kg/cm2, mm H20 or mmHg.
- Breakwire resistor acc E12 range for line monitoring (Only for C-enclosure).
 In case of **Option I** 47 Kilo-ohm (kΩ) ≥ higher.
- Hirschmann or Harting Connector.
- Moisture inhibitor.
- Chemical seals.

RECAPTURE: HOW TO SELECT YOUR BETA SWITCH

Selection of your switch is now completed.

If required: For "Optional" and "Special" requirements Options : See section 6. Options" on page 14.

Specials: See section "7. Specials" on page 14.

DIFFERENTIAL PRESSURE SWITCHES

The "User Friendly" generation of BETA switches offers you,

a complete range of - Differential Pressure Switches.

LOW RANGE

"D...L"- SERIES

Principle:	As pressure switch, with sealed Aluminium sensorbody (optional in 316 SS).					
Range: Max. Static Pres	12 - 2 ssure: 30 ba	12 - 1250 mbar. 30 bar.				
Application:	Dry clean air, inert gases and clean non-corrosiv fluids and gases.					
Execution:	Weathertight IP 66 (C-enclosure),Ex i a/b(C-enclosure + option I),Ex d, Ex t(W-enclosure).					

** Low side only available in 1/4 NPT/ BSP F aluminium or SS 316.

* "Clean fluids and gases", must be free of particles > 40µm, filters (not included) are recommended in case of contaminated medium. A differential pressure switch is a "dead end" instrument, so a simple filter with fine mesh will work.

GENERAL PURPOSE

"D...M"- SERIES

Principle:	Principle:2 x piston/diaphragm type with seperate sealing for High and Low.				
Range: Max. Static Pres	0.3 - 70 ssure: 140 bar	bar.			
Application:	Fluid & gas applications which are chemically compatible and are within the switch range.				
Execution:	Weathertight IP 6 Ex i a/b Ex d, Ex t	6 (C-enclosure), (C-enclosure + option I), (W-enclosure).			

VERY LOW RANGE

Principle:As pressure switch in sealed.
Aluminium enclosure.Range:2 - 15 mbar. (With "L1" micro only).Max. Static Pressure:10 bar.Application:Dry clean air inert gases (Low side only).Execution:Weathertight IP 66,
(G3 enclosure only) with potted wire leads.

"P301L- .. - D"- SERIES

BETA Pressure & Temperature Switches.

DIFFERENTIAL PRESSURE SWITCHES

LOW RANGE / HIGH STATIC

"D.... H"- SERIES

Principle:	Piston type with single diaphragm, sealed in 316 SS sensorbody.				
Range: Max. Static Pressure:	80 – 3450 mba 200 bar	ar			
Application:	Clean fluids and gases*, provided acceptable choice of wetted parts is within our range.				
Execution:	Weathertight IP 66 Ex i a/b Ex d, Ex t	C-enclosure, C-enclosure + option I, W-enclosure			
** Low and High side, only	available in 1/4 NPT/ B	SP F, SS 316.			

LOW RANGE / HIGH STATIC

"D...D"- SERIES

	Bi-Directional Differential Pressure Switch				
	Principle:	Piston type with sir sealed in 316 SS s	ngle diaphragm, sensorbody.		
	Range:	0,1 – 3,5 bar			
	Max. Static Pressure	: 200 bar			
	Application:	Clean fluids and gases*, provided acceptable choice of wetted parts is within our range.			
	Typical application:	Natural gas pipelin pressure pipeline v	es, safe guarding high alves against being opened tial procesure from either		
* "Neg."		side.			
PB	Execution:	Weathertight IP 66 Ex i a/b	C-enclosure, C-enclosure + option I,		
	** Neg / Pos_side only available	Ex d, Ex t	W-enclosure.		

* "Clean fluids and gases", must be free of particles > 40µm, filters (not included) are recommended in case of contaminated medium. A differential pressure switch is a "dead end" instrument, so a simple filter with fine mesh will work.

The BETA Temperature Switch is a pressure switch enclosure incorporating a sealed 2-phase (vapor/liquid) temperature sensor.

When the temperature of the process increases, the vapor pressure of the liquid increases simultaneously.

If this vapor pressure exceeds the pre-adjusted setpoint of the "pressure" switch,

it will actuate the switching element.

- Available as direct- or capillary mount sensor.
- In weathertight and explosion proof models (ATEX approved).
- Fits into most standard thermowells (10,5 mm bore).
- No need for ambient temperature compensation (No setpoint shift).
- Excellent repeatability/small dead-band.
- All 316 stainless steel sensor and capillary (SS armored).
- Filling system of gas/liquid acc. to SAMA-Class II C.

"C"- Series with Direct mount type sensor.

EXPLOSION-PROOF TEMPERATURE SWITCH

With the W-enclosure or the C-enclosure Option i, the BETA Temperature Switch is approved for ATEX, IECEx, FM, CSA and several more, acc. EN 60079 standards

"W"- Series with Capillary type sensor.

SENSOR CODE:	CLASSIFICATION:	ELECTRIAL COND. CONN.:	MATERIAL:	EARTH TERMINAL:	TERM. BLOCK:	
C1	Intrinsically safe (with Option "I") Ex ia/ ib	PG 13.5	Aluminium			
C2		M20 x 1.5			Standard	
C3		3/4" NPT (F)		Standard		
C4		1/2" NPT (F)		(Internal)		
C8		M20 x 1.5	SS 216 (1)			
C9		3/4" NPT (F)	33 3 10 I)			
W3	Explosion-proof ATEX & IECEx: Ex db	3/4" NPT (F)	Aluminium			
W8		M20 x 1.5	SS 216 1)	Standard In- & External	Standard	
W9	Ex tb	3/4" NPT (F)	33310 T)			

1) Includes SS 316 sensor body and adjusting nut.

RANGE CODE	ADJUS RAN	MAX TYPICAL. 3 DEADBAND		MAX. TEMPERATURE		PROOF TEMPERATURE		MAX. PROCESS PRESSURE		
T 528 H	-40 / +40	°C			+125	°C	+200	°C		
T 548 H	0 / +80	°C	3	°C	+200	°C	+250	°C	175	hor
T 568 H ¹⁾	+60 / +180	°C			+300	°C	+350	°C	175	Dar
T 588 H ²⁾	+160 / +300	°C	3.5	°C	+400	°C	+450	°C		

1) In case process temperature > 130°C, Direct mount sensing bulb is not recommended.

2) Not in combination with Direct mount sensing bulb.

3) For deadband calculation in combination with "SR"- and "SP"- micro, consult your BETA representative.

NOTE:

All SS316 sensor/ extension rod/ capillary and sliding nut with compression fitting, SS304 armouring tube.

The BETA temperature sensor is to used in combination with a thermowell or pocket tube, in order to avoid leakage as sliding/ compression nut adjustment is not considered to be leak tight.

3

Sensor Bulbs:

C3 - T548H - D00 - S0 - K1 - Y - X2

PROCESS CONNECTION:	SENSOR CODE:	TYPE OF TEMPERATURE SENSING BULB:					
	D00	Direct mount	128 mm length				
1/2" NPT (M)	D02	Direct mount. 1)	225 mm length				
	C02		2 m. capillary length				
	C03		3 m capillary length				
	C05	Capillary mount.	5 m. capillary length				
	C10		10 m. capillary length				
	СХХ		Special capillary length 2)				

Note: All SS 316 stainless steel sensor, capillary (SS 304 armored) and compression fitting.

- Not in combination with range T588H (+160/+300 °C), not recommended with T568H in case of process temperature >130 °C.
- 2) Length of capillary should be specified, consult your BETA Switch Representative. (Max.:15 mtr.)

** Thermowells available, see page 30.

Diaphragm/O-rings:

C3	-	T548H	-	D00	-	S0	-	K1	-	Υ	-	X2	

All temperature switches have "S0" welded diaphragm.

5

The standard Switching elements are: "K1" for C - and W - enclosures

Deadband Multiplier micro switch element similar as for pressure switch. For other available switching elements and additional technical information see 5 on pages 11 and 12.

Options:

C3 - T548H - D00 - S0 - K1 - Y - X2

OPTION CODE	DESCRIPTION
С	Cable gland (weather proof IP66), Ex d, Ex t, Ex e in acc. with classification of enclosure).
I ³⁾	Intrinsically safe application (Ex i). Only on "C"-Series.
s ¹⁾	Stainless steel Tag key attached to enclosure. Tag has 2 lines (16 characters per line).
V	Fungicidal varnish coating (internal).
Y 2)	Epoxy coating of enclosure and sensorbody (external).

Tag no. space on nameplates

Specials:

C3	-	T548H	-	D00	-	S0	-	K1	-	Υ	-	X2

BETA can incorporate many specials to meet your requirements.

These special requirements are indicated by the letter "X" in the model code or at the end of the model number, followed by a figure showing the number of specials.

Example:

"X1" at the end of modelcode reference means one special.

"X2" at the end of modelcode reference means **two** specials have been incorporated.

Details of each special must always be specified completely on enquiries and orders.

BETA Pressure & Temperature Switches.

BETA offers complete line of switches for (classified) hazardous area!

The "BETA Switch" is a safety instrument and adds an extra dimension to industrial safety because a wide selection of switches is available - up to safety level Category 2 - for hazardous areas (e.g. ATEX, IECEx)

Benefits:

• Worldwide agency approvals.

IECEV IECEVITS 17 0010 V

- "User Friendly" Modifications Standard features incorporated for your safety.
- · Minimal amount of wetted parts minimal maintenance needed.
- · High overrange pressures allowed without setpoint shift or damage of functional parts
- Designed for reliability over the full life cycle time.

BETA SWITCHES for HAZARDOUS AREA

<section-header><text>

BETA has its "C"-Series switches with option "I" certified by KIWA acc. to NEN EN 60079-0 / EN 60079-11 for,

II 1 G Ex ia IIC T4...T6 Ga or II 2 G Ex ib IIC T4...T6 Gb or II 1 D Ex ia IIIC T85°C Da or II 2 D Ex ib IIIC T85°C Db

ATEX approved	: KIWA 15 ATEX 0023X	(-60 to +80°C)
IECEx approved	: KIWA 15.0011X	(-60 to +80°C)
CSA approved	: Cert.No.: 1891054	(-40 to +80°C)
FM Approved	: Cert. No.: 3031247	(-40 to +80°C)

(For more information see also page 23)

This option includes all required installation materials including a blue colored EEx e approved terminal block and the (standard) earth terminal.

Option "I" in accordance with art. 9 of the ATEX Directive 2014/34/EU (Ex ia/ib IIC) which are related to insulation, clearance, creepage distances and enclosure type whereby a max. peak voltage of 90 V or 3,3A is allowed.

"C"- Series (Intrinsically safe application (Ex i).

Please note the following:

When a switch is ordered with cable gland (option "C") BETA will automatically install the Ex e blue cable gland (see drawing). Due to low current used in intrinsically safe systems we recommend the use of switching elements with gold contacts. (code "G1," "O1" or "Y1").

The "W"- Series is a worldwide best seller.

"The separate adjustment compartment allows easy field calibration. Due to the wide selection of materials and components parts, virtually all applications can be covered".

ATEX approved	ITS 17ATEX 1018

IECEx: IECEx ITS 17.0019 X

(For more information see also page 23)

- Aluminium with Extremely rugged powder coated enclosure which is suitable for tough offshore applications. (1000 hrs. Salt spray test acc. to DIN 50021, IEC 60068-2-11 or ASTM B117-90) or 316 SS enclosure.
- Separate adjustment compartment.
- Available as Pressure-, Hydraulic-, Vacuum-, Differential pressure- and Temperature switch.
- All ranges available.
- Highest overrange protection.
- Excellent for field mounting (2" Pipe SS mounting bracket available). see page 31.
- Epoxy coating optional.
- Also available in SS316.

BETA PRESSURE & TEMPERATURE SWITCH - CERTIFICATIONS:

SIL 3 certification:

In order to state SIL3 compliance based on the standard IEC 61508:2010, please consider the following conditions:

Always read the BETA installation, Operation, Safety Manual before installation, setting and testing is started Installation, setting and testing may only be performed by qualified personnel using calibrated equipment and based on the approved SIL I.O.S Manual Instruction.

BETA is not responsible for changes in settings out of BETA production.

EXPLOSION-PROOF Certifications:

Besides the already mentioned explosion-proof certificates, also available are:
